

Strictly for internal use

# SAP Gateway

One Technology, a World of Experiences

## Day 2C Agenda

- ❖ Upload Document
- ❖ Download Document
- ❖ Queries

# Upload Document

- ❖ In SAP NetWeaver Gateway, the OData Channel provides Upload functionality to accommodate the saving document against a business object . The upload functionality is provided in ABAP interface /IWBEP/IF\_MGW\_APPL\_SRV\_RUNTIME, method create~ stream
- ❖ Some business objects, such as Sales Orders or Purchase Orders, consist of pay receipts or signatures .

Thus, after creating such business objects we save these documents data against them and for this we use upload document

- ❖ We have step-by-step approach published by our team in a document attached in the email.

# Download Document

- ❖ In SAP NetWeaver Gateway, the OData Channel provides Upload functionality to accommodate the saving document against a business object . The upload functionality is provided in ABAP interface /IWBEP/IF\_MGW\_APPL\_SRV\_RUNTIME, method get~ stream
- ❖ Some business objects, such as Sales Orders or Purchase Orders, consist of pay receipts or signatures . Thus, after creating such business objects we save these documents data against them and to view this documents against the document in the display we use download document

**Any Questions ?**

**Thanking You**
